

MINJUN KIM

M.S. Applicant in Electrical Engineering and Computer Science | Fall 2027

+82 10-1234-5678	minjun.kim@example.com	Seoul, Republic of Korea	github.com/minjunki m-ai
------------------	------------------------	--------------------------	-----------------------------

RESEARCH INTERESTS

Trustworthy machine learning, document intelligence, human-AI interaction, and efficient multimodal systems.

EDUCATION

Hanul Institute of Technology - B.S. in Computer Engineering

Seoul, Republic of Korea | Mar 2021 - Feb 2027 (expected) | GPA: 3.92/4.00 | Major GPA: 3.96/4.00

Selected coursework: Machine Learning, Natural Language Processing, Computer Vision, Algorithms, Operating Systems, Distributed Systems, Probability and Statistics.

RESEARCH EXPERIENCE

Undergraduate Researcher, Intelligent Systems Laboratory | Sep 2024 - Present

- Developed a layout-aware document understanding pipeline combining OCR tokens, visual features, and a lightweight transformer; improved field extraction F1 from 0.84 to 0.91 on a 12,000-page internal benchmark.
- Designed uncertainty calibration and evidence highlighting to support human review of eligibility decisions.
- Co-authored one workshop paper and released a reproducible evaluation toolkit.

Research Intern, Mirae AI Research | Jun 2025 - Aug 2025

- Built retrieval and reranking components for Korean-English technical document search, reducing unsupported answer rate by 19% in offline evaluation.
- Implemented ablation studies and error taxonomies with Python, PyTorch, and PostgreSQL.

SELECTED PROJECTS

ApplyWise - Evidence-Grounded Application Assistant | 2026

- Led a four-person team building a macOS document agent that extracts requirements, checks applicant eligibility, highlights supporting evidence, and prepares submission files.

EdgeVision - Efficient Visual Inspection | 2025

- Compressed a defect-detection model for Apple Silicon, achieving 2.4x faster inference with less than 1% accuracy loss.

MINJUN KIM

Curriculum Vitae - Continued

PUBLICATIONS AND PRESENTATIONS

Kim, M., Park, S., and Lee, J. "Calibrated Evidence Extraction for Long-Form Application Documents." Workshop on Practical Document Intelligence, 2026. (Fictional sample citation)

Kim, M. "Human Review Interfaces for Uncertain Document Decisions." Hanul Undergraduate Research Symposium, 2026.

LEADERSHIP AND SERVICE

President, Hanul AI Student Society | 2025 - 2026

- Organized weekly reading groups and a 120-participant student hackathon; secured sponsorship and mentored six project teams.

Teaching Assistant, Data Structures | Spring 2025

- Led lab sessions for 42 students and created visual debugging exercises for trees, graphs, and dynamic programming.

HONORS

- Dean's High Honors, six semesters (2021-2026)
- Hanul Presidential Scholarship for Academic Excellence (2024-2026)
- Best Student Project, Hanul Engineering Expo (2026)

TECHNICAL SKILLS

Languages: Python, C++, Swift, JavaScript, SQL

ML/Data: PyTorch, Transformers, OpenCV, scikit-learn, pandas

Systems: macOS, Linux, Git, Docker, PostgreSQL, REST APIs

Languages: Korean (native), English (advanced)
